

ENVIRONMENTAL **POLICY**

WHAT WE WANT

- Considerately treat soil, water, air and any other environmental elements.

HOW TO ACHIEVE IT

- By properly respecting the defined waste sorting rules.
- By following the operating procedures when making repairs, particularly when handling substances that might have a negative environmental impact.
- By using environment-friendly cutting fluids and cooling emulsions.
- By preventive inspection of risky machinery parts and equipment.
- By following the operating procedures when making repairs, particularly when handling substances that might have a negative environmental impact.
- By regular environmental training.
- By identifying any and all risks that might damage the environment.

WE HAVE COMMITTED TO

- Avoid environmental damage caused as a result of our business to the maximum extent.
- Thoroughly respect any and all EMS-related statutory and legal regulations.
- Continuously improve the operating procedures and perform any and all activities in a way to continuously improve the system, emphasise elimination of environmental pollution.
